

HQParts SCH40 PVC Pipe and Fitting products for drainage management and water supply are of the highest construction and quality. Our ASTM rated products provide you the high quality PVC products your customers need. Our quality products are a key aspect of the installation of PVC products in HVAC application, installation and HVAC related drain management.

PRODUCT FEATURES

- **High Flow Ability**
The inside and outside wall are smooth, the coefficient of friction is small, roughness is only 0.008 to 0.009, anti-fouling property is strong.
- **Corrosion Resistant**
PVC-U material has strong resistance to most of acid and alkali. No rust, no antiseptic treatment. The service life is 4 times than that of cast iron.
- **Light Weight and Easy Installation**
Weight is very light. The density of PVC-U is only 1/5 to 1/6 of that of cast iron.
- **High Tensile Strength**
PVC-U has high tensile strength, and high shock strength. The piping network of PVC-U is not easy to break, and it works safely.
- **Long Service Life**
The piping network with normal material can be used around 20 to 30 years, but the PVC-U piping network can be used longer than 50 years.

PRODUCT USE AND SPECS

- SCH40 & ASTM D2466 Fittings
- SCH40 & ASTM D1785 Pipe
- HVAC condensate drain piping
- Piping for condensate drainage or irrigation networks – non-potable water supply
- Residential and Commercial Applications
- Fittings in Cased Quantities for Easy Storage and Shipping
- PVC Pipe Bagged in 10 Packs for Convenient, Safe Storage and Product Containment
